

Says

What have we heard them say?
What can we imagine them saying?

Thinks

What are their wants, needs, hopes, and dreams?
What other thoughts might influence their behavior?

I was expecting something different.

What brand do you like?

What you think?

I want something awesome

What is best for me?

Why is this so hard?

House price prediction in a metropolitan city in India is a valuable solution for potential home buyers, real estate agents, and investors.

By leveraging historical sales data, property details, and location-specific information, a predictive model can accurately estimate house prices.

The models scalability, real-time updates, user-friendly interface, and transparency ensure it meets the needs of stakeholders.

By addressing these requirements, the prediction model provides reliable insides empowering stakeholders to make informed decisions in the fast-paced real estate market.

Integration capability, data privacy, and cost-effectiveness are also important considerations.
